

## Why limit your management and technical expertise to *one* company?

We support the management teams in many leading German and international industrial companies in their pursuit of operational challenges and entrepreneurial success.

### Our core competencies:

- Productivity gains, process optimization, project management in supply chain, production, and maintenance
- Innovation & strategy development
- Business integration & expansion
- Site optimization

**For our further growth we are looking for skilled people with degrees primarily in:**

## Engineering, Technology or Science to fill current Management Consultant openings

### We are a performance-based team and offer you:

- Projects at a Board Level
- Varied and demanding challenges
- High level visibility
- A collegial management style
- Work in interdisciplinary project teams
- A high level of income
- A generous benefits package
- A generous vehicle allowance
- Exciting internal advancement opportunities

**We are looking for colleagues with a proven managerial background and extensive project experience. You should possess persuasive abilities and implementation skills including the following attributes:**

- Entrepreneurial talent
- Confidence when dealing with seasoned managers
- Top tier professional skills
- Keen analytical strengths
- Conceptual strength
- Methodical and structured work style
- Operational readiness, integration capability
- Graduate degree / STEM concentration
- MBA highly desirable
